InSolem SARL

Bilateral Meetings

- Friday (02:00 pm - 07.00 pm) Please add the cooperation profile
- Saturday (10:00 am - 01:00 pm) Please add the cooperation profile

Description

InSolem is developing innovative solar solutions for domestic and industrial applications. One of our promising applications consists in the development of a low-cost solar desalination technology, for decentralized usage

Organization Type

SMEs

Areas of Activities

Water technologies, space application to agriculture, environmental management

Technological Offer

Low-cost solar desalination solution

We are developing a low cost solar desalination technology, for decentralized applications (<1.000m³/day). Our objective is to provide freshwater solutions that are 100% independent from fossil fuel energy, and that are economically competitive (water costs between 2€/m³ and 4€/m³). We are currently in the R&D phase, and we are looking for potential partners to make the project successful.

Keywords: Freshwater Low-cost Solar energy Solar desalination Desalination Water supply 100% energy autonomy Low cost water supply

Cooperation Offered

1. Technical co-operation
2. Outsourcing co-operation

Cooperation Requested

1. Outsourcing co-operation
2. Technical co-operation
3. Investment/Financing

Technological Offer

Low-cost Solar Trackers

We are developing low-cost two axis solar trackers for photovoltaic and for concentrated solar power applications

Keywords: Solar energy Solar Tracker Low-cost PV Photovoltaic Concentrated Solar Power CSP Heliostat

Cooperation Offered

1. Outsourcing co-operation
2. Technical co-operation

Cooperation Requested

1. Sales / Distribution
