Business Offer

## **ANSELMO SPA - MACHINES AND SYSTEMS FOR PASTA FACTORIES**

Anselmo into one of the leading and most highly acclaimed Companies in the word for the design, construction and installation of systems and machinery for pasta production factories. Anselmo designs, manufactures and installs:

- Production lines for long pasta: production capacity from 500 Kgs/h to 5000 Kgs/hr.
- Production lines for short-cut pasta: production capacity from 500 Kgs/hr to 6000 Kgs/hr.
- Production lines for Cous-Cous: production capacity from 500 Kgs/hr to 3000 Kgs/hr.
- New revolutionary production short cut line able to produce as well nests!: production capacity from 500 Kgs/hr to 2000 Kgs/hr of short cut shapes OR from 250 till 1000 Kg/h of nests in the same line!!!

Our ideal partners are the following:

- Companies already producing PASTA.
- Traders of PASTA interested to start their own local production activity, in order to overcome the problem of high cost generated by import duties and transport.
- Companies already producing Noodles. These producers are using same raw material, the production process it is not too much different from PASTA and, finally the selling channel (grocery) it is the same!!!
- The millers. The added value of a mill is in general rather low. All millers therefore, sooner or later, are investing in bread or biscuits or snacks or PASTA!!
- Companies already producing different foodstuff products (for instance snacks or confectionary) interested to add some more basic food to their portfolio.
- Companies non in the food business (for instance tobacco or other sectors under “pressure” ), interested to diversify their products portfolio, in order to spread their risks.
