Energy production, renewable energies

Other sectors relevant to the thematic focus of the event

Research & Development

Renewable Energy Cooperation Programme

EUROCHAMBRES is promoting the activities of the multi-donor Renewable Energy Cooperation Programme which includes:
•Technology-oriented market studies/reports, including information on resource assessments, political conditions, market access, business environments, investment conditions and potentials for different technologies at the request of business associations in Africa and the EU;
•Informing and alerting African and European businesses about opportunities in the renewable energy sector in Africa;

•Organising road-shows in Africa and Europe to bring together experts and thereby provide companies willing to invest with practical advice, and help them link up with local partners;

•Organising trade missions and trade fairs in Africa and the EU in order to enable businesses to establish contacts with local private sector actors as well as decision makers and provide opportunities for African and European companies to market their products;

•In coordination with the activities under Action Area 4, capacity building measures are initiated in cooperation with businesses and local partners in order to transfer required skills for preparation, operation, and maintenance of sites.
